

# AGILE

# PRINCIPLES

**AGILE PRINCIPLES**

**V1.0**

Our highest priority is  
to satisfy the customer  
through early and  
continuous delivery of  
valuable software.

**AGILE PRINCIPLES**

**V1.0**

Welcome changing requirements, even late in development. Agile processes harness change for the customer's competitive advantage.

**AGILE PRINCIPLES**

**V1.0**

Deliver working software frequently, from a couple of weeks to a couple of months, with a preference to the shorter timescale.

**AGILE PRINCIPLES**

**V1.0**

Business people and  
developers must work  
together daily  
throughout the project.

**AGILE PRINCIPLES**

**V1.0**

Build projects  
around motivated  
individuals. Give them  
the environment and  
support they need and  
trust them to get the  
job done.

**AGILE PRINCIPLES**

**V1.0**

The most efficient  
and effective method  
of conveying  
information to and  
within a development  
team is face-to-face  
conversation.

**AGILE PRINCIPLES**

**V1.0**

Working software is the  
primary measure of  
progress.

**AGILE PRINCIPLES**

**V1.0**

Agile processes promote sustainable development. The sponsors, developers, and users should be able to maintain a constant pace indefinitely.

**AGILE PRINCIPLES**

**V1.0**

Continuous attention  
to technical excellence  
and good design  
enhances agility.

**AGILE PRINCIPLES**

**V1.0**

Simplicity - the art of  
maximizing the amount  
of work not done - is  
essential.

**AGILE PRINCIPLES**

**V1.0**

The best architectures,  
requirements and  
designs emerge from  
self-organizing teams.

**AGILE PRINCIPLES**

**V1.0**

At regular intervals,  
the team reflects on  
how to become more  
effective, then tunes  
and adjusts its behavior  
accordingly.

**AGILE PRINCIPLES**

**V1.0**
